EDUCATION

Athens University of Economics and Business

Undergraduate in Department of Informatics

Oct. 2021 – Present

PROFILE

Computer Science student focused on Front-end development, with hands-on experience in modern web technologies. Interested in building clean, user-focused interfaces and improving through real-world projects.

PROJECTS

Personal Portfolio — HTML5, CSS3, JavaScript

- Designed and developed a personal portfolio using HTML, CSS, and JavaScript.

Web Development — HTML5, CSS3, JavaScript

Oct. 2023 - Dec. 2024

- Built a responsive website using semantic HTML5, CSS Grid/Flexbox, and media queries.
- Added interactive features and form validation with JavaScript.
- Optimized for accessibility, performance, and cross-device compatibility.

Artificial Intelligence — Python, VS Code

Dec. 2023 - Jan. 2024

- Implemented Naive Bayes and Logistic Regression classifiers in Python on the IMDB dataset.
- Performed data preprocessing, feature extraction, and model evaluation (precision, recall, F1).
- Built and compared RNN models with word embeddings using TensorFlow.

Distributed Systems — Java, Android Studio, IntelliJ

Mar. 2024 - Jun. 2024

- Developed a distributed Java application using TCP sockets for network communication.
- Implemented JSON-based data exchange with multithreading and synchronization for concurrency control.
- Applied the MapReduce model for efficient parallel data processing.

Operating Systems — C, virtualbox

Apr. 2024 - May. 2024

- Simulated a concurrent pizzeria system in C using threads, mutexes, and condition variables.
- Modeled real-time events and optimized resource utilization.

TECHNICAL SKILLS
